

2-DAY PITO POWERED INDUSTRIAL TRUCK OPERATOR COURSE

Certificates Issued:

Powered
Industrial Truck
Operator (2-Day)

Program Description:

The Powered Industrial Truck curriculum addresses safety requirements when working with lift trucks. It covers types of lift trucks (forklift, telehandler), attachments, stability, and lift truck safety. It includes recognition of hazards that may be encountered on site when using a powered industrial lift truck and inspections of the machine and site that are required before using the equipment.

This program includes the following topics:

- Definition of a Power Industrial Lift Truck - Forklifts, Telehandlers
- Hand Signals
- Center of Gravity for a Load
- Telehandler Parts
- General Maintenance
- Different Types of Lift Trucks
- Stability of a Forklift
- Load Charts
- Operators' Manuals
- Operator Guidelines
- Attachments
- Stability of a Telehandler
- Forklift Parts
- Equipment Inspections
- Safety Considerations (Spotters)

After covering the theory on power industrial trucks, the students must go inspect and document a forklift and a telehandler. Once inspection is complete the student must operate the machine and utilizing all its functions. There are several different types of objects to pick up and move/stack. This course complies with regulatory standards.
